React, Django, Django Rest, SpringBoot, Bootstrap

Databases:

MongoDB, MySQL

Cloud:

Microsoft Azure

Version control:

Git

Technologies:

Docker, Postman

I am a junior web developer with a solid foundation in web development acquired through my recent training. I am highly motivated to learn new technologies and methodologies. During my studies, I developed a particular interest in backend development, dedicating my free time to deepening in this field. I am confident that my passion for technology and my adaptability will enable me to contribute effectively in any position within the development team.

Professional Experience

Software Developer

March 2024 – June 2024

Solum Photovoltaic Innovation

I have worked on developing the internal web for the management of charging stations
